EDUCATION

Narsee Monjee Institute of Management Studies

Mumbai, India

B.Tech Data Science (2019-2023)

CGPA: 3.83 / 4 (Rank: 2)

SKILLS

- Languages: Python, C, SQL
- Tools: Pytorch, Tensorflow, Tableau, MongoDB, Redis

PROJECTS

Multilingual Abusive Comment Identification

- Built a system to identify abusive comments in low-resource multi-lingual text data from Sharechat/Moj platform.
- Used **state-of-the-art transformers** with PyTorch and Tensorflow for text modelling along with gradient boosting methods to develop a multi-modal solution with a **mean F1 score of 0.9**.
- Research paper: [Link](#)

YouTube Video Engagement Prediction

- Engagement prediction of youtube videos based on its metadata.
- Employed **extensive feature engineering and text vectorization techniques** on video metadata (title, description, thumbnails) to predict the like-to-view ratio of YouTube videos.
- Utilised **CatBoost** and achieved **MAE score of 0.0152**.
- Code: [Link](#)

Key Phrase Extraction from clinical notes

- Detecting the presence of important key points in clinical patient notes by leveraging transformers
- Used a **multi-span question answering** approach that combines extractive question-answering and NER approach using Pytorch.
- Code: [Link](#)

WORK EXPERIENCE

Management Trainee

El Dorado Capital, Dubai, UAE

May 2024 - Present

- Developed and automated a **cloud based historical data pipeline using Cloudflare Workers and R2**, ensuring secure and efficient data retrieval.
- Built tools to enhance data validation, backtesting and modelling processes.
- Built **systematic trading signals using data analysis** of various market inefficiencies.
- Conducted preliminary research on integrating machine learning to enhance trading systems, demonstrating a keen interest in leveraging data science methodologies for optimising trading outcomes.

Junior Associate

rFund.ai, Mumbai, Maharashtra

December 2022 to January 2024

- Developed and **executed data-driven trading strategies for Indian markets**, specialising in options and cash equity. Used a meticulous process involving filtering, backtesting, and live validation with capital deployment.
- **Led a team on diverse engineering, trading, and research projects**, showcasing strong leadership and collaboration skills.
- Engineered in-house monitoring tools for stock screening, trade monitoring, and PnL tracking. Built a high-performance system for executing multiple options strategies across varied timeframes, **reducing latency using Redis and AWS**.

ACHIEVEMENTS

- Winner: Amazon ML Challenge - NLP competition (Rank: 7/4898)
- Winner: IIIT-D Multilingual Abusive Comment Identification by ShareChat/Moj - NLP competition (Rank: 1/54)
- Silver Medal: CommonLit Readability Prediction- NLP/ML Competition on Kaggle - (Rank: 87/3633)
- Finalist: KaggleDays World Championship
- Bronze Medal: Optiver Trading at the Close - Time series competition (Rank: 283/4436)
- Bronze Medal: Brain Tumor Radiogenomic Classification - Computer Vision Kaggle Competition - (Rank: 105/1555)
- Winner: Predict YouTube Video Likes (Pog Series #1) - Multi-modal ML Competition (Rank: 1/88)
- Winner: Ingenium 2022 - ML competition organized by Ahmedabad University (Rank: 2/16)
- Winner: ACM - DJCSE CODEIT- 20 hackathon
