

EDUCATION

University of Arizona

Tucson, Arizona

BS Computer Science, BS Information Science

August 2020 - May 2024

GPA: 3.89/4.0

Global Wildcat Scholar: \$140000

TECHNICAL SKILLS

Languages: Python, Java, C#, C, C++, SQL, NoSQL, PostgreSQL, JavaScript, TypeScript, Haskell, Racket, Shell Scripting

Frameworks: React, Angular, Vue, Node.js, Express, Flask, .NET, RESTful APIs, AWS, Azure, Docker, Git

Libraries: Pandas, Matplotlib, NumPy, Scikit-learn, WhisperAPI, LangChain, CSS, Webpack, JavaFX, JDBC

Core Competencies: Algorithms, Data Structures, Machine Learning, Agile Methodologies, Design Patterns

WORK EXPERIENCE

Student IT Analyst

May 2022 – May 2024

University of Arizona (Campus Health)

- Analyzed and resolved software problems related to medical programs and electronic health record systems, implementing point-and-click solutions that resulted in a **30% improvement** in user experience.
- Successfully diagnosed **over 200** technological queries and issues over the phone and in-person, ensuring **90%** of tickets were solved within the service level agreement (SLA).
- Provided installation, maintenance, and repairs of **50+** desktop and laptop computers, contributing to the seamless functioning of critical IT infrastructure.

PROJECTS

E-Commerce Website | *React, JavaScript, HTML, CSS, ES6*

- Led the creation of an E-Commerce platform, securing a 100% Lighthouse performance, SEO, and best practices score, through strategic use of React, Vue, and CI/CD, which accelerated development by 40% and reduced load times by 20%.

San Francisco Film Locations Data Analysis | *SQL, Python, AWS, ETL*

- Led data analysis on San Francisco film locations with SQL and Python, optimizing ETL pipelines on AWS for 35% faster processing, enhancing data quality, and improving stakeholder accessibility by 50%.
- Leveraged analytical models to uncover trends, informing city planning and boosting tourism promotional campaign efficiency by 20%

TARS 2.0 AI System | *Flask, WhisperAPI, IBM Watson, LangChain, Streamlined Data Processing, Twilio*

- Led backend development for the TARS 2.0 AI System, utilizing Flask for server-side logic and Twilio for scheduling message delivery, enhancing user interaction capabilities.
- Integrated advanced AI services using WhisperAPI and IBM Watson, coupled with LangChain for enriched, anticipative conversational AI experiences.
- Optimized data processing flows, achieving more efficient and responsive human-machine communication.
- Won 1st prize in the Fall 2023 iShowcase event, demonstrating the system's innovation and impact.

Gym Management Database System | *SQL, Oracle, Java, JDBC*

- Developed an Oracle-based relational database for gym management, streamlining operations and improving data integrity, which enhanced operational efficiency by 25%, reduced data errors by 30%, and increased customer satisfaction by 15%.

Mobile TCP Proxy | *C, HTTP, Socket Programming, Unix Network Programming*

- Engineered a mobile-aware TCP proxy in C, leveraging advanced socket and Unix network programming to maintain telnet sessions across IP transitions, reducing session drop rates by over 50% and improving session recovery times by 30%.

Machine Learning's Role in Better Diagnosis from Patient Notes | *Machine Learning, NLP, Data Analysis, Python, PyTorch*

- Designed and implemented a data preprocessing pipeline utilizing NLP to convert unstructured text into high-quality data for model training
- Optimized machine learning models (Random Forest, SVM, Decision Trees), achieving a 90% F1 score
- Employed clustering and data mining to uncover patterns in patient data, aiding in the development of personalized treatment plans

ACADEMIC EXPERIENCE

Content Tutor

August 2023 - May 2024

Think Tank — CRLA Certified Tutor

- exceptional communication skills and effective time management techniques to conduct **over 100** drop-in sessions and private individual tutoring sessions, fostering a supportive learning environment for students.
- Provided tailored academic support in Mathematics, implementing personalized communication strategies to address the diverse needs and learning styles of **50+** students, resulting in **80%** students improvement in their grades.

CS Teaching Assistant

August 2023 - May 2024

University of Arizona | Java

- Guided students through the complexities of Software Development (CSC 210), enhancing their understanding through engaging lectures and interactive lab sessions.
- Offered personalized assistance by hosting regular office hours, conducting one-on-one feedback meetings, and promptly addressing student queries on course discussion forums, with a particular focus on problem-solving in Data Structures and Object oriented programming.
- Actively contributed to the enhancement of course content and delivery methods through regular participation in staff meetings and collaborative brainstorming sessions.
